Profile

SENA Software Programming Technologist. Standing out for the ability to work as a team and individually, with a focus on collaboration, responsibility and commitment. I seek to apply and strengthen my skills in an environment that values integrity and continuous growth.

Technical skills

Backend development in: Python, PHP, Java

Frontend development in: JavaScript, NodeJS Framework

SQL MySQL and NoSQL MongoDB database

Studies

Sena software programming technician
2021 - 2022

Sena software programming technician
2023 - 2024

Work Experience

Grupo ASD

2024 Sena Intern (April - October)

Backend Developer (Python). I led a team of 7 developers, using agile methodologies. Among my main tasks are:

- API development using FastAPI
- Docker container management
- Using Kibana and Elasticsearch
- Use of AWS tools (ECS and Fargate)
- Using Git tools
- Task management using Jira

Aromaseo Limpieza

2023 - Currently

I work as a distributor of hygiene products, efficiently managing the delivery and distribution of merchandise. This role has allowed me to develop skills in logistics, customer service and inventory management, always ensuring customer satisfaction and punctuality in deliveries.
